OBJECTIVE

Data Analyst specializing in Excel, SQL, Power BI, and Python, with hands-on experience building business dashboards and analytics tools across music streaming, airline operations, and sales forecasting. Known for automating reporting workflows, improving data accuracy, and turning raw data into decision-ready insights.

EDUCATION

Nandha Engineering College Bachelor of Engineering (ECE) CGPA: 8.2	2020 – 2024
SR Matriculation Higher Secondary School HSC (Computer Science) Percentage: 65%	2019 - 2020
SR Matriculation Higher Secondary School SSLC Percentage: 84.2%	2017 – 2018

TECHNICAL SKILLS

Primary Stack:	SQL (MySQL, SQL Server), Advanced Excel, Power BI, Python (Pandas, NumPy).
Data Visualization:	Power BI, Tableau, Matplotlib, Seaborn.
Data Analytics:	ETL Pipelines, Data Cleaning, Data Wrangling, Query Optimization, CTEs, Window Functions.
Business Analytics:	Statistical Analysis, KPI Development, Dashboard Design, Reporting, Data Quality.
Tools:	Excel (Pivot Tables, Power Query), Git, MySQL Workbench, Jupyter Notebook.
Analytics & Reporting:	Data Cleaning, Data Wrangling, Statistical Analysis, Data Visualization, Dashboard Design, KPI Monitoring, Reporting.

PROJECT EXPERIENCE

Music Trends Analytics Dashboard (Excel, Power BI)

- Built an interactive analytics dashboard on 12,000+ Spotify tracks to analyze artist performance, genre trends, and listener behaviour.
- Automated data cleaning and transformation using Power Query, cutting manual prep time by 40%.
- Designed KPIs, slicers, and trend visuals to enable faster insight discovery and improve reporting clarity.
- Generated insights on high-performing genres and seasonal listening patterns to support content strategy decisions.

Airline Operations Insight Dashboard (Excel, Tableau)

- Built structured Excel spreadsheets to organize 50,000+ records for reporting and analysis.
- Used pivot tables, filters, and charts to identify trends in delays, cancellations, and airline performance.
- Collaborated with peers to validate datasets and ensure timely and accurate reporting.
- Communicated insights through visual dashboards to support operational decision-making.

Sales Forecasting & Visualization Tool (Excel, Python, MySQL)

- Built a full-stack sales analytics tool using Python and MySQL to analyze 5+ years of historical sales data.
- Automated data extraction, cleaning, and reporting workflows, reducing analysis time by 45%.
- Developed interactive charts (revenue trends, seasonality, product performance) to support management decision-making.
- Designed a multi-page Tkinter GUI for non-technical users, improving usability and adoption.
- Implemented statistical methods to identify growth trends and forecast future sales patterns.
